

APIGEE to APIM Migration

Transform Your API Management with NSEIT

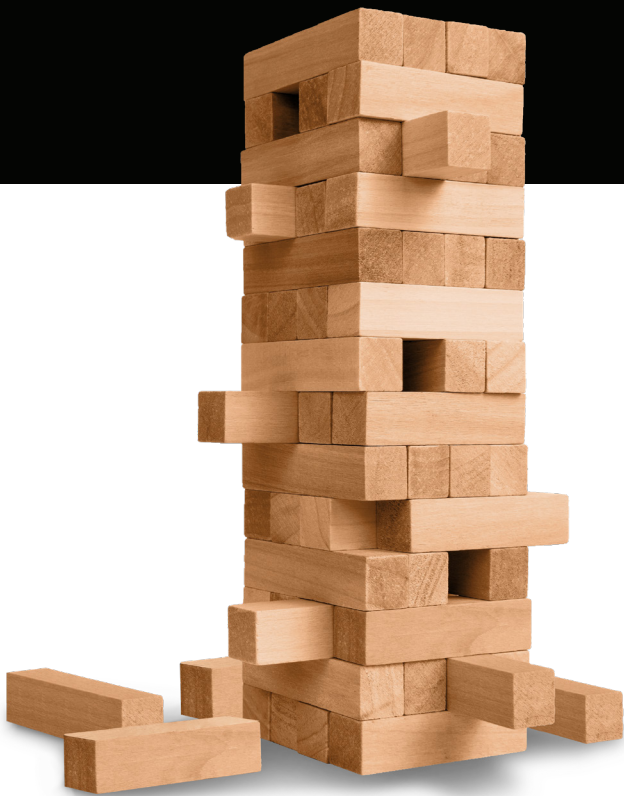

SOLUTION BRIEF

The Need for **APIGEE to APIM Migration**

Organizations continuously seek scalable, secure, and efficient API management methods. The migration from APIGEE to Azure API Management (APIM) represents a strategic move for well-

integrated features within the Azure ecosystem, providing a seamless experience for managing APIs in the cloud.

The **Challenges**

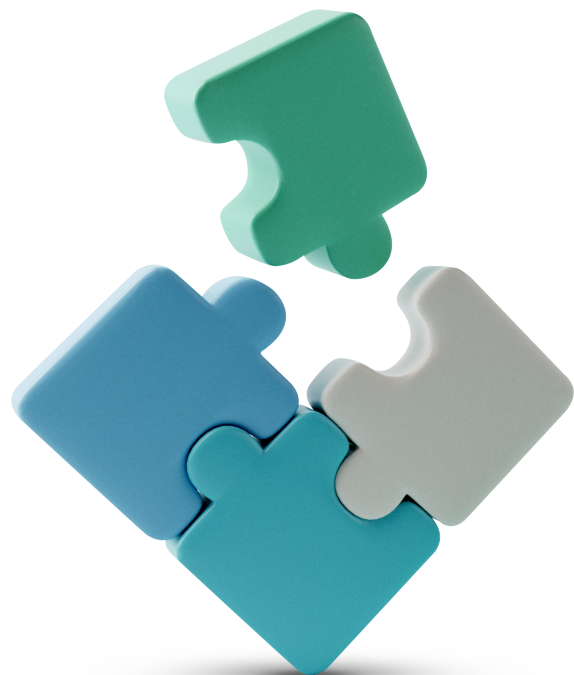

APIGEE, while robust, presents several challenges for organizations seeking tighter integration with Azure cloud services, including:

- ▼ **Limited integration with Azure-specific services**, which can hinder the full utilization of cloud capabilities.
- ▼ **Complex pricing models** that can escalate costs unpredictably.

The **Solution**

Azure API Management (APIM) addresses these challenges head-on, offering a comprehensive solution that enhances API management across various parameters:

- ▼ **Seamless Integration:** APIM is deeply integrated with Azure services, ensuring a unified approach to managing APIs and cloud services.
- ▼ **Cost Efficiency:** APIM provides a predictable pricing model that scales with your usage, helping to manage costs more effectively.

Key Features of **APIM Include**

- ▼ Built-in policies and flexibility to add policies at different levels
- ▼ Robust security with Azure Active Directory integration, VNet integration, and private endpoint support.
- ▼ Azure Developer Portal for developers to work with Azure APIs and efficiently explore, test, and manage Azure services within a user-friendly interface streamlining the development process.
- ▼ Automated and scalable API management to accommodate growth.
- ▼ Comprehensive analytics for monitoring API usage and performance.

Why **APIGEE to APIM** Migration Makes Sense

Migrating from APIGEE to APIM is more than just a change of platforms; it's a strategic upgrade:

- ▼ **Better Cost Management:** APIM's pricing model is more predictable and often cost-effective.
- ▼ **Enhanced Performance:** APIM's cloud-native features ensure that APIs perform optimally with minimal latency on the Azure cloud.

Why Work with NSEIT for your **APIGEE to APIM Migration?**

- ▼ **Proven Expertise:** Years of experience managing and executing complex migration projects.
- ▼ **Custom Solutions:** Tailored migration strategies that consider your unique API landscape.
- ▼ **End-to-End Support:** A holistic migration journey with a smooth transition from planning to post-migration.
- ▼ **Strategic Alignment:** We ensure your migration aligns with business goals and technology strategies.
- ▼ **Minimized Disruption:** Our approach minimizes operational disruption during the migration process.
- ▼ **Continuous Improvement:** Post-migration, we offer support and insights to optimize your API management practices continuously.
- ▼ **Partnership:** Solution partner for Microsoft

About **NSEIT**

NSEIT Limited is a digital native technology company that engineers world-class solutions to help our global customers accelerate their digital transformation journeys. Our key service pillars are Application Modernization, Business Transformation, Data Analytics, Infrastructure & Cloud Services, and Cybersecurity,

through which we create intuitive digital experiences and tangible business impact. For over two decades, our innate drive for excellence has made us the partner of choice for global organizations. At NSEIT, we fuel digital progress.
