

Empowering Banking Transformation

with Digital Solutions

BROCHURE

Introduction

Unlock new opportunities in banking with our digital solutions. Enhance process efficiency, boost product profitability, and secure your operations with advanced technology. Our offerings streamline operations, drive revenue growth through personalized customer insights, and fortify your cybersecurity defenses. Whether improving performance or reducing risks, we provide tailored solutions that meet your banking needs.

Capabilities

Unlock new opportunities in banking with our digital solutions. Enhance process efficiency, boost product profitability, and secure your operations with advanced technology. Our offerings streamline operations, drive revenue growth through personalized customer insights, and fortify your cybersecurity defenses. Whether improving performance or reducing risks, we provide tailored solutions that meet your banking needs.

01

Process Efficiency:

Enhance agility, accessibility, security, and decision-making through application modernization and banking IT solutions that streamline operations and deliver faster, more efficient results.

02

Sustainable Finance:

Leverage AI-driven ESG analytics to integrate environmental, social, and governance (ESG) factors into your investment strategies. Our solutions simplify ESG data integration, improve risk management, and ensure compliance with evolving sustainability regulations.

03

Digital Banking Solutions:

Boost product profitability and deepen customer engagement with advanced, analytics-driven business intelligence. Personalize products and services to improve marketing and sales effectiveness.

04

Balance Sheet Performance:

Maximize productivity and reduce costs with end-to-end process automation, reducing manual efforts and giving you a comprehensive view of your operations.

05

Cybersecurity:

Protect your organization from threats by identifying security gaps, simulating attacks, and assessing cyber defense efficacy in real-time. Our solutions help evaluate security controls, mitigating risks and exposure.

Use Cases

1

Corporate Banking:

Recalibrate digital initiatives to drive innovation while maintaining robust security. Our scalable solutions cover core banking, lending, treasury, trade finance, AML, fraud, compliance, and workflow management.

Retail Banking:

Transform operations and deliver a superior customer experience with our full-service solutions covering onboarding, query management, customer service, fraud management, and collections.

2

3

Cards and Payments:

With next-gen APIfication and digital payment solutions, innovate across merchant and customer interfaces, modernize legacy systems, and improve fraud and risk management.

Why NSEIT?

With decades of experience in the banking domain, NSEIT is your trusted partner in digital transformation. Our expertise in application modernization, business transformation, data analytics, cloud services, and cybersecurity enables us to deliver customized solutions that drive real business impact. We are committed to helping you accelerate your digital journey, improve operational efficiency, and secure a competitive edge in the market.

Success Stories

Automating Collections for Compliance and Efficiency:

We automated the collection management system for a private bank in India, reducing task allocation time, improving fund tracking, and cutting NPAs. This system provided a 360-degree view of accounts, improving collection efficiency and ensuring real-time delinquency management.

Driving Product Profitability with Analytics:

A leading bank faced customer acquisition and engagement challenges. We implemented an analytics solution that unified customer profiles, improved cross-selling and up-selling strategies, and increased profitability through data-driven insights.

Improving Regulatory Oversight for India's Apex Bank:

We supported India's banking regulator by developing an end-to-end system for managing External Commercial Borrowings (ECB) and trade credits. This platform streamlined approvals, enhanced data management, and improved governance, cutting transaction approval times by four times and accelerating policy-based changes.

Enhancing Cybersecurity with Red Team Assessment:

We conducted a Red Team Assessment for a large banking corporation in Asia Pacific to identify vulnerabilities and evaluate threat exposure. By simulating real-world attacks using the MITRE ATT&CK framework, we uncovered critical flaws, improved detection capabilities, and provided recommendations to enhance the overall security posture. This assessment helped optimize security

NSEIT is committed to transforming the banking industry through innovative, digital-first solutions. From improving operational efficiency and product profitability to bolstering cybersecurity and regulatory compliance, our end-to-end offerings help banks of all sizes unlock new opportunities. By partnering with us, you gain access to deep industry expertise, advanced technology, and a proven track record of success. Let us help you drive growth, enhance customer experiences, and secure your operations in today's fast-evolving digital landscape.

About **NSEIT**

NSEIT is a leader in digital transformation, providing cutting-edge AI solutions that empower financial institutions to navigate the complex world of sustainable finance.

With our focus on ESG integration, data analytics, and responsible financial practices, we help our clients make smarter, more sustainable investment decisions.
