NSEIT
Asset Management Services

Empowering Wealth Creation
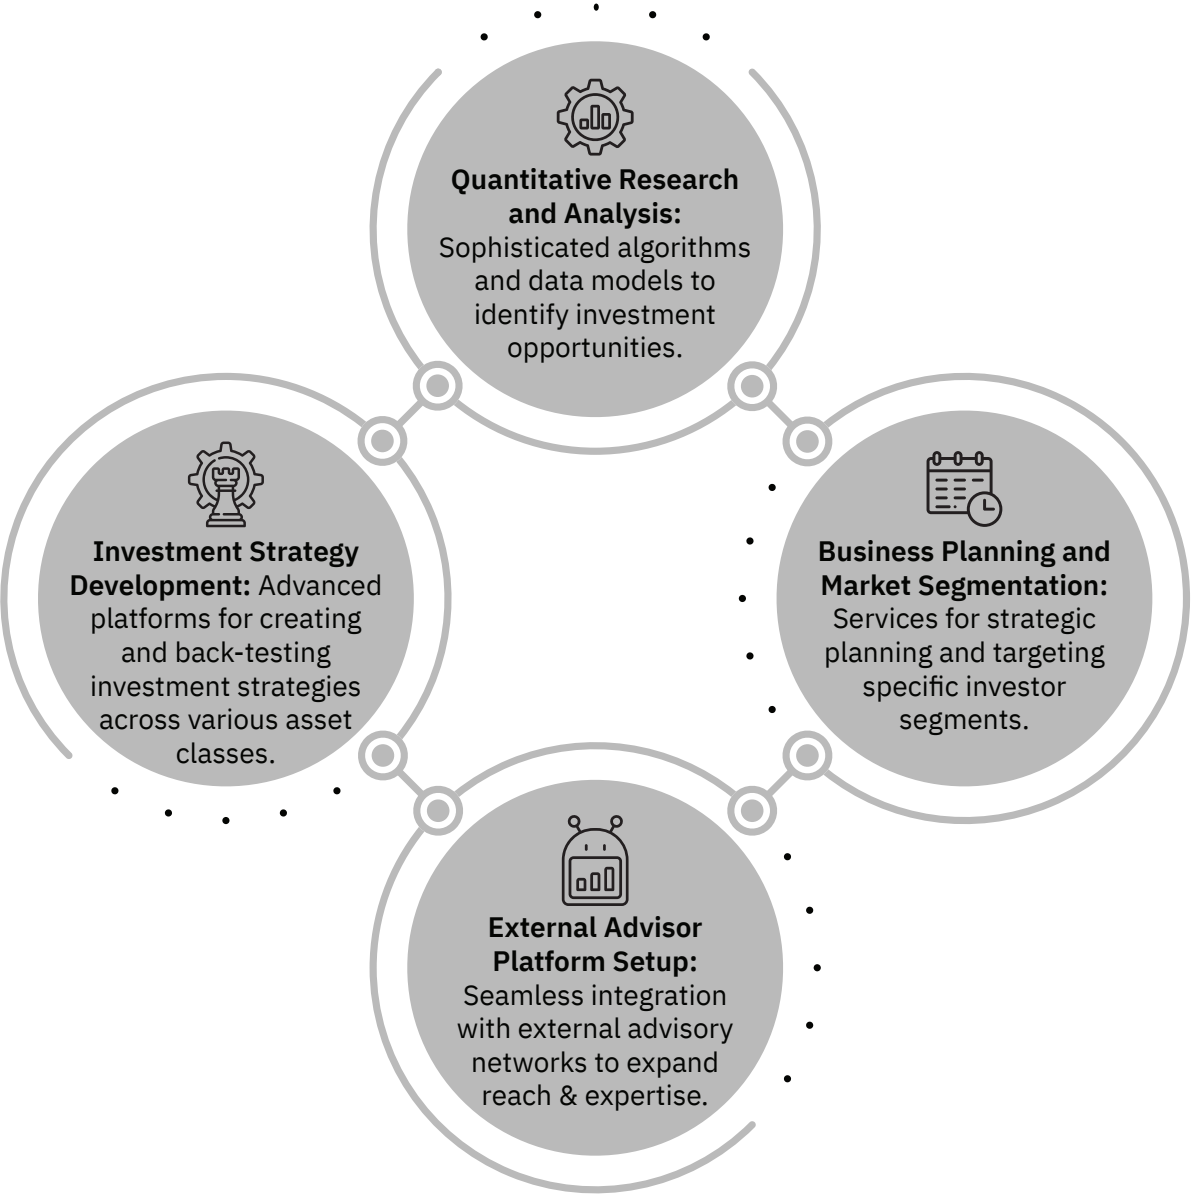

BROCHURE

Introduction

In the dynamic world of asset management, staying competitive requires cutting-edge technology and innovative services. At NSEIT, we understand that the asset management landscape is constantly evolving, driven by changing investor preferences, regulatory requirements, and technological advancements.

NSEIT stands at the forefront of this revolution, offering a comprehensive suite of services designed to transform every aspect of the asset management value chain. From pre-trade analysis to post-trade settlements and ongoing wealth management, our services cater to the diverse needs of asset management companies, their clients, and stakeholders.

Capabilities

Pre-Trade Services

NSEIT offers advanced services for informed decision-making before trade execution:

Quantitative Research and Analysis: Sophisticated algorithms and data models to identify investment opportunities.

Investment Strategy Development: Advanced platforms for creating and back-testing investment strategies across various asset classes.

Business Planning and Market Segmentation: Services for strategic planning and targeting specific investor segments.

External Advisor Platform Setup: Seamless integration with external advisory networks to expand reach & expertise.

Trade Execution

Our trade execution services ensure efficient and compliant order management:

> **Order Creation and Management:**
> Robust systems for creating, routing, and managing orders across multiple asset classes.

> **Trade Execution:**
> High-performance execution engines supporting various order types and trading strategies.

> **User Management:**
> Granular control over user permissions and access levels to maintain security and compliance.

> **Complex Instrument Orders:**
> Advanced capabilities for handling derivatives, structured products, and other complex financial instruments.

Post-Trade Processing

NSEIT provides comprehensive post-trade services to ensure accuracy and efficiency:

1 **Clearance and Settlement:**
Automated systems for timely and accurate trade settlement across markets.

2 **Regulatory and Tax Reporting:**
Customizable reporting services to meet various regulatory and tax requirements across jurisdictions.

3 **Reconciliation:**
Advanced reconciliation engines to ensure data consistency across systems and counterparties.

4 **Corporate Actions Processing:**
Automated handling of dividends, stock splits, and other corporate events.

Wealth Management

Our wealth management services cater to the needs of both institutional and individual investors:

Client Onboarding and KYC:
Streamlined processes for client acquisition and ongoing due diligence.

Portfolio Analysis and Optimization:
Sophisticated services for constructing and optimizing investment portfolios.

Performance Evaluation:
Comprehensive performance measurement and attribution analysis.

Client Reporting:
Customizable reporting services to keep clients informed about their investments.

Risk Management

NSEIT offers robust risk management services to protect investments and ensure compliance:

Market Risk Analysis:
Real-time monitoring and analysis of market risks across portfolios.

Counterparty Risk Assessment:
Services for evaluating and managing exposure to various counterparties.

Compliance Monitoring:
Automated checks to ensure adherence to investment mandates and regulatory requirements.

Scenario Analysis and Stress Testing:
Advanced modeling capabilities to assess portfolio performance under various market conditions.

ESG Integration

Our services support the growing focus on Environmental, Social, and Governance (ESG) factors in investment decision-making:

ESG Data Integration:
Services for incorporating ESG data into investment analysis and decision-making processes.

ESG Scoring and Screening:
Customizable frameworks for evaluating investments based on ESG criteria.

ESG Reporting:
Comprehensive reporting capabilities to communicate ESG performance to stakeholders.

Operational Efficiency

NSEIT provides services to streamline back-office operations and enhance overall efficiency:

Workflow Automation:
Customizable workflow engines to automate routine tasks and processes.

Document Management:
Centralized systems for storing, retrieving, and managing investment-related documents.

Data Integration and Management:
Services for seamlessly integrating data from various sources and ensuring data quality.

Vendor and Contract Management:
Services for managing relationships with service providers and tracking contractual obligations.

Why NSEIT?

Choosing NSEIT as your technology partner in the asset management space offers numerous advantages:

01. **End-to-End Expertise:**
Our comprehensive understanding of the asset management value chain allows us to provide integrated services that address challenges across all stages of the investment process.

02. **Cutting-Edge Technology:**
We leverage the latest advancements in artificial intelligence, machine learning, and cloud computing to keep our clients at the forefront of investment innovation.

03. **Scalability and Performance:**
Our services are designed to handle large volumes of data and transactions, scaling seamlessly as your business grows.

04. **Regulatory Compliance:**
We stay abreast of evolving regulatory requirements, ensuring our services help clients easily maintain compliance across multiple jurisdictions.

05. **Customization and Integration:**
We offer flexible services that can be tailored to seamlessly integrate with existing ecosystems and unique business models.

06. **Global Perspective:**
Our experience across various international markets allows us to bring global best practices to every project.

07. **Client-Centric Approach:**
We prioritize understanding each client's unique needs and challenges, delivering services that drive tangible business value.

08. **Continuous Innovation:**
Our commitment to research and development ensures that our clients always have access to the most advanced asset management technologies.
