

NSEIT's Digital Transformation Services

We Fuel Digital Progress

BROCHURE

THE DIGITAL IMPERATIVE

Adopting a digital approach and a lean start-up mindset is how organizations can redefine how products and portfolios are developed, built, and deployed using agile product teams and modern work patterns. To stay ahead of the curve and meet the ever-evolving customer

expectations, it is imperative for enterprises to find avenues to implement digital transformation across each enterprise function, right from infrastructure and product lifecycle management to talent management, customer experience, and regulatory compliance.

WHAT WE DO

NSEIT offers a fully integrated combination of consulting services, industry and market analysis, product creation, and operational support to help CXOs address the challenges of digitization. Our portfolio of innovative solutions helps enterprises transform, automate, and unlock their business potential and empowers them to build successful digital journeys for their customers.

Combining the strength of our four strong technology pillars - Applications, Cloud, Data Analytics and Cybersecurity - we empower businesses to understand digital disruption and re-invent & re-design business/operating models to fuel customer-centric innovation and growth. With over 20+ years of expertise across large-scale complex digital implementations, we have been the trusted and go to partner for 300+ customers across India, the US and the Middle East.

SERVICE PORTFOLIO

Application Services

Digital engineering

- App Development & Support
- Platform led Application Development
- Technology Upgrades
- Legacy Modernization
- Application led Cloud Migration
- Enterprise Content Management

Digital foundation

- APIfication
- Microservices
- Application Integration Services
- Event Stream Processing
- DevXOps Adoption
- Agile Transformation
- Quality Engineering and Assurance

Business transformation

- Transformation Assessment
- RPA / IPA
- Business Process Automation
- IT Ops
- Processing Management
- Decision management

Experience transformation

- Omni-Channel Experience
- Hyper Personalization
- DXP / Low Code No Code
- UI Modernization
- Chat Bots & Conversational AI
- UI Less Interface (Voice)

Data Services

Data modernization

- Data Strategy
- Data Migration
- Data Lake / Lakehouse
- Data Warehousing
- Data Engineering

Business analytics

- BI Strategy & Transformation
- Visualization & Narratives
- Descriptive Analytics
- Diagnostic Analytics

AI/ML/Data science

- AI/ML Based Automation
- Smart Decision Systems
- Deep Learning
- Computer Vision, NLP

Cloud Services

Cloud hosting

- Colo
- Public & Private Cloud
- BYOC
 - Open Stack
 - Open Shift

Cloud manage platform

- Reduce complexity & improve visibility
- Reduce cloud spend
- Effective governance
- Improve security & compliance

Monitoring & automation

- AI-Ops
- APM & Infra Monitoring
- IT GRC
- Audit & Process Standardization
- Infrastructure Automation
- Infrastructure Life Cycle Management

Enterprise services

- Cloud Migration
- DRAAS
- DC/DR Operations & Management
- Network Operations & Management
- Database & Storage Management

Cybersecurity Services

Cybersecurity Strategy

- Cybersecurity Assessment & Strategy
- Risk and Compliance Advisory
- 360°Managed Security Design
- GRC Automation
- Third Party Risk Management
- Data Flow Analysis
- Data Protection Strategy

Identity and Access

- Consumer IAM
- Robotics Driven IAM
- Zero Trust Access Control
- Risk Aware IAM
- Privileged Access Management
- Cloud Identity
- Managed IAM

System & Application Security

- Vulnerability Assessments & Penetration Tests
- Network Security Assessments
- DevSecOps
- Red Team Engagements
- Offensive Security
- ICS/OT Security

Security Engineering

- SW Supply Chain Security
- Code Signing
- Threat Modelling
- Custom Security Development
- Ecosystem Engineering
- Firmware Mastering
- IoT Management & Security

Cloud Security and Infrastructure Protection

- Cloud Security for Workplace – MS Azure, Office365
- Cloud Security for Multi-Cloud
- CI/CD Security
- Cloud Security Configuration and Automation
- CASB Strategy and Deployment
- Security for Microservices

Managed Detection and Response

- SIEM, SOAR and SOC
- Endpoint Detection & Response
- Threat Intelligence
- Threat Analytics
- Breach Attack Simulations
- Security Product Management as a Service
- Converged SOC for IT and OT

12 REASONS TO WORK WITH US

20+ Years of domain and technology expertise 1	300+ Clients served globally 2	Strong industry partnerships and alliances 3
Working with 22 Fortune 500 companies 4	Partnering with 5 Fortune 50 companies 5	Delivering services across EMEA & North America seamlessly 6
Next-gen data harnessing capabilities that accelerate time-to-insight 7	Practitioner's experience in legacy systems, new-age containerization, and microservices-based transformations 8	Communities and Innovation Council for continuous excellence 9
Deep domain expertise to align technology modernization programs with business objectives 10	Expertise in over 30 cutting-edge data analytics tools and technologies 11	Advanced technology partner with AWS for enterprises and PSP verticals 12

CERTIFICATIONS & COMPETENCIES

- Public Sector
- Solution Provider
- Storage Services Competency

- Migration Services Competency
- AWS Microsoft Workloads Services Competency

FEW SUCCESS STORIES

Implementation of a Secure Hybrid Cloud for a Leading Bank

The team at NSEIT helped its banking customer set up a Hybrid Cloud, with public cloud security and compliance features in place, thereby causing a substantial uprise in application agility and efficiency. With Microsoft Azure Stack in tow, and an internet-connected model supplementing the hybrid cloud integration, we provided services that enmeshed safe and easy migration to Azure Cloud while leveraging other essential PaaS services.

Anomaly Detection in Algorithmic and Non-Algorithmic Trading Using Machine Learning

We helped our client improve anomaly detection in trading patterns using ML-based surveillance compared to their existing traditional rule/query-based surveillance. This approach helped the client reduce false positives, integrating real-time and past data for better contextual understanding and broadening the scope to catch more breaches and gain more control over investigations.

Channel Portal for one of the Largest General Insurance Companies

NSEIT developed and delivered a microservices-based Channel Portal that provided a rich and consistent digital experience for the client that wanted to transform and redevelop their obsolete insurance agent portal. The client wanted the new portal to be flexible, scalable, and extensible to support all its product lines and key business functions, including new business, endorsement, renewal, claim, servicing, etc., for agents, partners, and customers. The new portal helped the client to enhance productivity with full visibility into daily operations, optimized service performance, boosted efficiency, and heightened customer satisfaction.

About NSEIT

NSEIT Limited is a digital native technology company that engineers world-class solutions to help our global customers accelerate their digital transformation journeys. Our key service pillars are Application Modernization, Business Transformation, Data Analytics, Infrastructure &

Cloud Services, and Cybersecurity, through which we create intuitive digital experiences and tangible business impact. For over two decades, our innate drive for excellence has made us the partner of choice for global organizations. At NSEIT, we fuel digital progress.
