

Secure your future by migrating VMware workloads to Azure

Cloud adoption is accelerating. **By 2024, 70% of workloads will be on the cloud¹**

Whether it is concerns about security threats, the need for software and hardware updates, limited budgets and resources, or managing end-of-life support, Azure offers an on-demand infrastructure and elastic scalability that delivers a superior total cost of ownership, enhanced flexibility, and a fertile environment for fostering innovation.

Your organization today

- Existing VMware on-prem environment
- Existing VMware skillsets
- Existing VMware licenses

Cloud benefits

- Save with consumption-based licensing
- Stop overprovisioning hardware
- Gain business and IT agility
- Access global scale and elasticity
- Increase security and resiliency
- Use hybrid cloud options, if needed

Choose your migration path

Modernize your VMware workloads with native Azure IaaS or PaaS services and take advantage of many cloud benefits and existing licenses. Alternatively, join the many organizations that have found that migrating VMware workloads "as is" with Azure VMware Solution is the fastest path to the cloud. Choose one or both; either option takes advantage of Azure's management, security, and compliance services.

Azure VMware Solution

Migrate VMware "as is"

- Retain VMware skills, familiar tooling
- Migrate quickly/datacenter exit, no application modifications required
- Use VMware technology stack on Azure for symmetry with on-premises
- VMware subscription licenses included, no on-prem license required

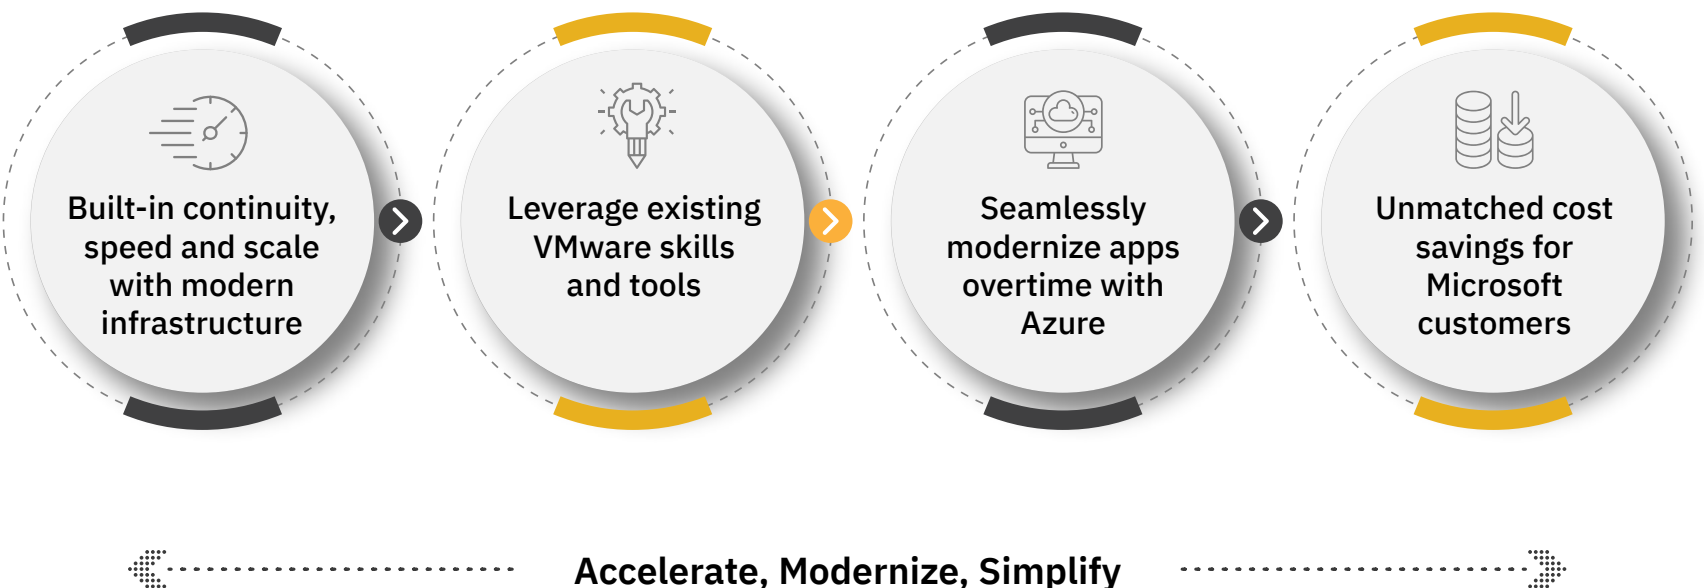

Azure IaaS and PaaS

Modernize to native Azure

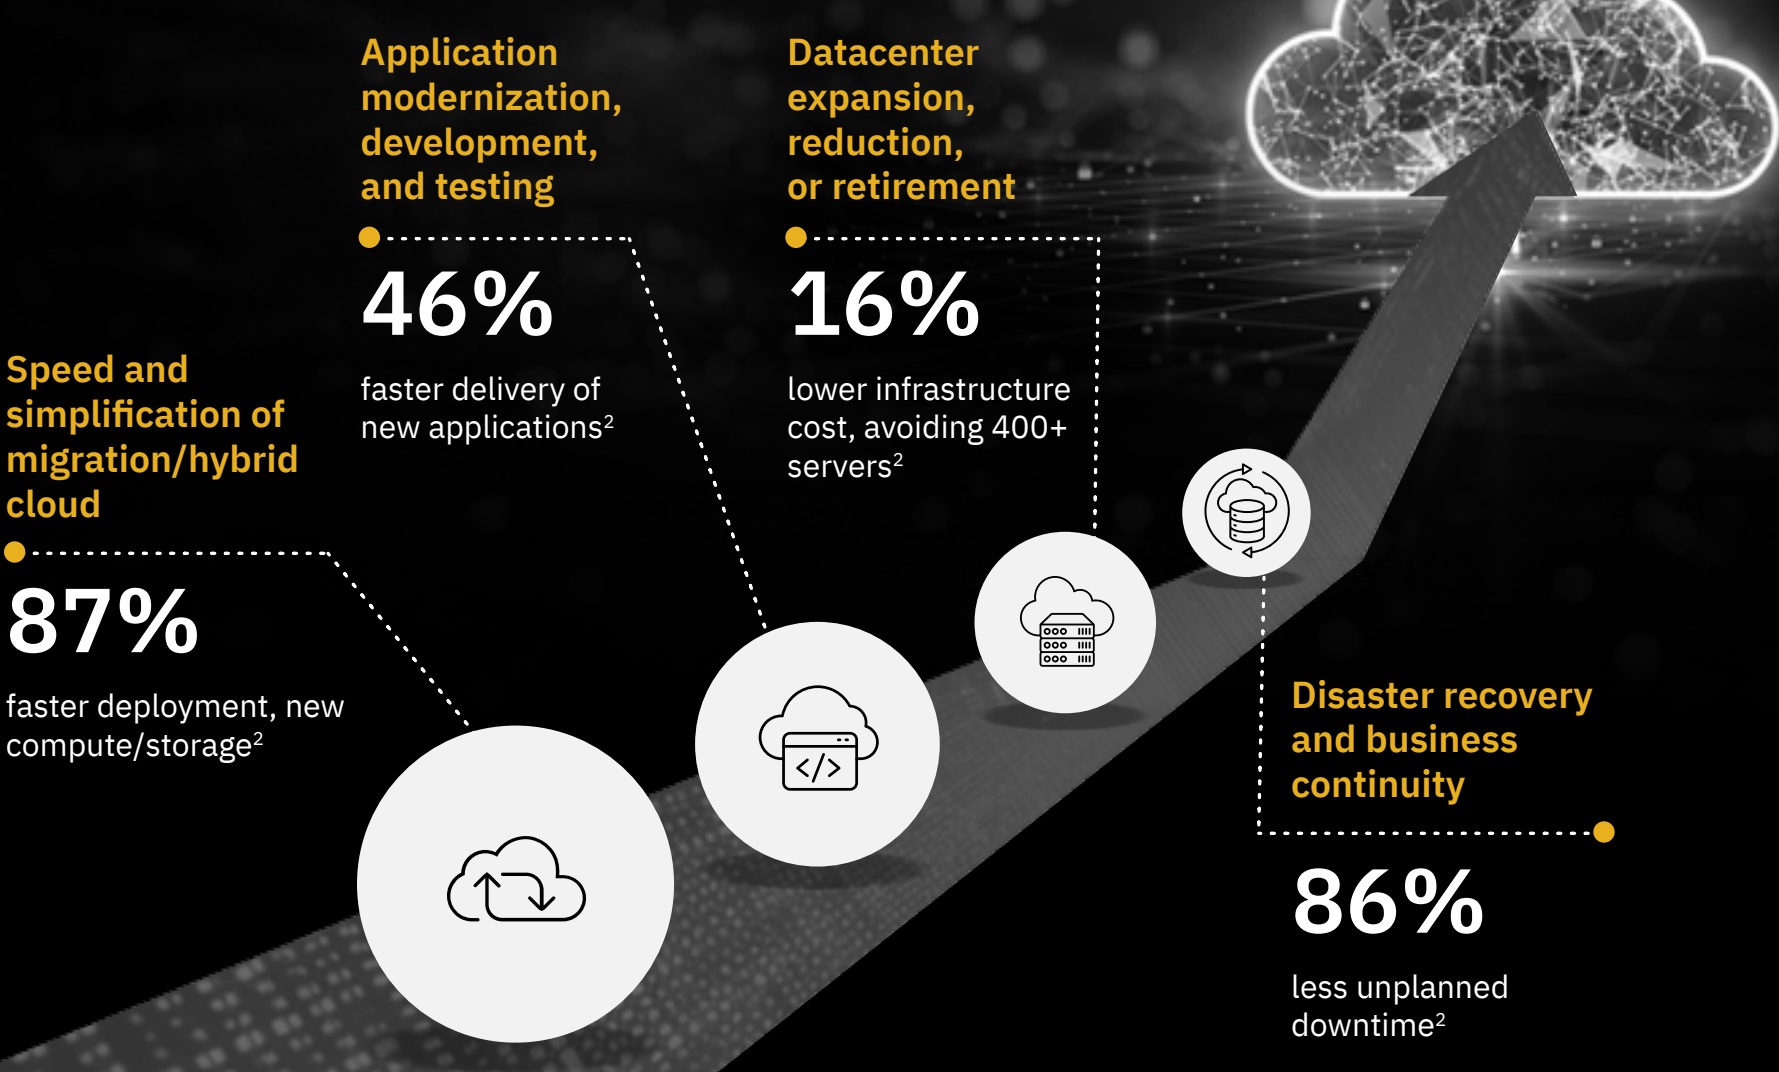

- Leverage Azure and cloud skills
- Modernize with flexible IaaS and PaaS services
- Shift to Azure compute, storage, and networking infrastructure
- No VMware licenses required

Azure management and security services

Increase productivity with elasticity, scale, and fast provisioning cycles by migrating your VMware workloads to Azure

Migrate your VMware to Azure and enable:

Let's schedule a call to talk about how our team can simplify the next step in your cloud migration journey
