

# Top 5 reasons to migrate with Azure VMware Solution

Azure VMware Solution (AVS) lets you seamlessly move VMware workloads from your datacenter to Azure and easily integrate additional Azure services—all while continuing to manage your IT environments with the same VMware tools you already know.

While there are many benefits, we've identified the top five reasons why AVS is proving to be the optimal route to the cloud for many organizations.

## AVS is Azure

Run your VMware platform and workloads today in the cloud without needing to re-architect applications and gain the continuity, scale, and fast provisioning for your VMware workloads on global Azure infrastructure.

Nearly **\$600B** forecasted Worldwide end-user spending on public cloud services in 2023

Gartner, April 2023

## Accelerate the journey to cloud, at your pace

AVS provides the path forward to move to the cloud on your terms. Gain the choice and flexibility to determine what workloads to migrate and when to migrate them. With platform symmetry, you have the control to transform based on your cloud journey.

**70%** of all enterprise workloads will be deployed in the cloud by 2024

Approaches to Avoid Common Cloud Strategy Pitfalls (gcom.cloud) 2022

## Datacenter consolidation

Reduce, retire, or consolidate your datacenter footprint with a one-time redeployment of your VMware-based virtual machines. Lift and shift any vSphere-based workloads to Azure in a nondisruptive, automated, scalable, and highly available way without changing the underlying vSphere hypervisor.

Nearly **53%** more efficient IT infrastructure team

## Unmatched cost savings for Microsoft customers

AVS provides the most cost-effective way to run Windows Server and SQL Server on VMware. Reduce datacenter costs with benefits available to Microsoft customers. Save by bringing existing licenses to Azure, lock in pricing for predictable workloads and protect older Windows Server and SQL Server workloads in Azure at no cost.

Up to **85%** savings with Azure Hybrid Benefit

Azure Hybrid Benefit Savings Calculator

## Application modernization, development, and testing

You can extend and run existing VMware workloads from on-premises environments to the cloud while avoiding the costs, risks, and time commitment of re-architecting applications. AVS enables you to seamlessly modernize existing solutions and bring new solutions to life by refactoring apps and workloads.

**46%** Faster delivery of new applications

## About NSEIT

NSEIT Limited is a digital native technology company that engineers world-class solutions to help our global customers accelerate their digital transformation journeys. Our key service pillars are Application Modernization, Business Transformation, Data Analytics, Infrastructure & Cloud Services, and

Cybersecurity, through which we create intuitive digital experiences and tangible business impact. For over two decades, our innate drive for excellence has made us the partner of choice for global organizations. At NSEIT, we fuel digital progress.
